

THE DAILY CALLER

Happy Memorial Day!

As we honor and remember the remarkable Americans who died serving in this country's armed forces, it is also relevant to consider *what* has made America exceptional. Our freedom of speech is a gift our founders provided, yet it is under attack from the many ideological opponents of America.

With that in mind, I am honored to bring you **Kirsten Powers**, of USA Today and Fox News, this week! She puts herself, ideologically, near the Elizabeth Warren camp, and has a new book out: "[The Silencing: How the Left is Killing Free Speech](#)." [Her path to Christianity](#) is also compelling and relevant to her courage to speak the truth!

The left is not happy with her expose and is making it difficult for her to speak the truth. Last week, I caught up with her in Washington and she talked about:

- Why she wrote her book,
- Who are some of the worst offenders of the "illiberal left/silencers,"
- The controversy over ABC's George Stephanopoulos donating to the Clinton Foundation and interviewing Peter Schweizer, author of "[Clinton Cash](#),"
- How much trouble Hillary Clinton is in with the Clinton Foundation fundraising scandal, and more!
